

Ultimate Wi-Fi. Coffee Table Ready.

Wi-Fi never looked so good.

Today's homes have multiple devices and users connected to the Wi-Fi at all times. Many Wi-Fi routers simply can't handle the increasing amount of high bandwidth traffic, especially when one family member is streaming HD video while another is on a video conference.

You deserve fast, reliable Wi-Fi throughout your home. No matter how many people are online.

Blazing speed and whole-home coverage

The GigaSpire BLAST u4 is a premium smart home system that combines blazing-fast speeds with whole-home coverage to deliver the Ultimate Wi-Fi Experience. Built with the latest Wi-Fi 6 technology, the GigaSpire BLAST u4 provides a longer range with higher efficiency and less interference than other Wi-Fi routers. Whether you're streaming HD videos on multiple devices simultaneously, uploading a large presentation for work, or gaming online with friends, the GigaSpire BLAST u4 has got you covered.

Not just easy on the eyes

The GigaSpire BLAST u4 is ideal for any space, delivering whole home coverage with consistent, reliable speed. What's more, the GigaSpire BLAST u4 features a sleek, unobtrusive design that will look great wherever you choose to put it in your home.

Minimalist design. Maximum power.

Support for more devices

Built with the latest Wi-Fi 6 (802.11ax) certified technology, the GigaSpire BLAST u4 enables more users and more devices to be connected to the Wi-Fi at the same time, without interference or lag.

Dual-band frequency for an optimized experience

GigaSpire BLAST u4 lets you take advantage of dual-band frequencies (2.4 GHz and 5 GHz) so that your device connections experience greater stability, speed, and bandwidth. High bandwidth applications like video streaming are routed to the 5 GHz band while lower bandwidth activities use the 2.4 GHz band.

Easy set-up and connectivity

The GigaSpire BLAST u4 is plug-and-play ready. Simply plug the unit into a power outlet and then follow the set-up process in the CommandIQ mobile app, which puts the control of your Wi-Fi network in your hands.

Automatic updates

Your data and privacy are kept safe with automatic security patches, firmware updates, and performance improvements.

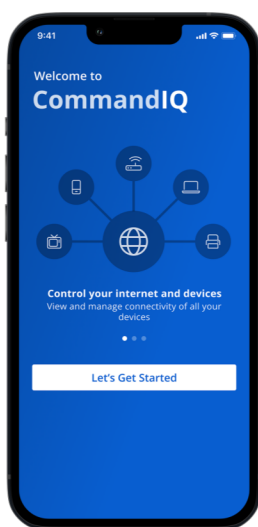

Consistent connection

The GigaSpire BLAST u4 responds to constantly changing Wi-Fi environments by making real-time traffic route adjustments to avoid congestion, buffering, and disconnects.

The CommandIQ App

Take control of your home with CommandIQ App View connected devices on your network, set basic parental controls, set up a guest network, or adjust your SSID and password.

Remote Support When You Need It

Our experienced customer support representatives are here to help should you experience any technical issues. As part of the Ultimate Wi-Fi Experience, the GigaSpire BLAST u4 is supported by remote monitoring and diagnostics, enabling our team to troubleshoot and solve a number of problems quickly – in most cases without having to send a technician to your house.

Device connections - We can see which of your devices are connected to the internet and check if they are receiving a strong Wi-Fi signal.

GigaSpire BLAST u4 uptime - We can review your system to see if it is functioning correctly and if it is consistently powered on.

Wi-Fi interference - We can identify any devices that are interfering with your Wi-Fi channels.

Internet errors - We can monitor your GigaSpire BLAST u4 signal or your internet connection to check if it is strong enough or if it is malfunctioning, based on both recent and real-time errors.
